Electrical Linework Program Certificate

PROFILE

Flutter Developer with over 2 years of experience in crafting user-centric and integrity-driven mobile applications. Committed to staying ahead of emerging technologies, particularly in the fast-evolving Web3 landscape. Strengths include a strong eagerness to learn and resilience to find solutions. My goal is to grow with the industry, collaborate with exceptional teams, and contribute to a vision that delivers real value to the world.

EXPERIENCE

Flutter / NestJS Developer – Tether RE
2023 – Present / Twin Falls, ID
Developed and maintained a real estate mobile application on both Android and iOS, designed to enhance the safety of real estate agents. An achievement includes integrating the platform with a 24/7 monitoring center that delivers immediate response when safety features are triggered. I've contributed to, built, and maintained all the safety features on the frontend and the majority on the backend, taking pride in ensuring accuracy and safeguarding users.

Data Analyst / Flutter Developer - ThirtyThree
2022 – 2023 / Yorba Linda, CA
Developed and maintained an application aimed at modernizing the cell tower surveying process, replacing traditional pen-and-paper methods to prioritize efficiency, dependability, and data accuracy.
